These formal drawings have been approved by the Draftsperson.

Rejection(s) Withdrawn

7) The provisional rejection of claims 1-4, 10-14, 16, 18, 19, 25 and 26 made in paragraph 10 of the Office Action mailed 12/13/00 (paper no. 7) under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 20, 21, 25-28, 32-35, 41 and 42 of co-pending application No. 09/376,770, is withdrawn in light of Applicants' amendments to the claims and/or the base claim(s).

8) The rejection of claims 1 and 25 made in paragraph 13 of the Office Action mailed 12/13/00 (paper no. 7) under 35 U.S.C § 102(b) as being anticipated by Longbottom (GenEmbl Database Accession number U72499, 25 September 1996) (Longbottom, 1996), is withdrawn in light of Applicants' amendments to the claims.

9) The rejection of claims 1, 4, 10-13, 16, 18, 19, 25 and 26 made in paragraph 14 of the Office Action mailed 12/13/00 (paper no. 7) under 35 U.S.C § 102(b) as being anticipated by Longbottom *et al.* (*Infect. Immun.* 66: 1317-1324, April 1998) (Longbottom *et al.*, 1998), is withdrawn in light of Applicants' amendments to the claims.

10) The rejection of claim 39 made in paragraph 21 of the Office Action mailed 02/25/02 (paper no. 15) under 35 § U.S.C. 112, first paragraph, as containing new matter, is withdrawn.

Rejection(s) Maintained

11) The rejection of claims 1-4, 10-14, 16, 18, 19, 25, 26, 38 and 39 made in paragraph 22 of the Office Action mailed 02/25/02 (paper no. 15) under 35 U.S.C § 112, first paragraph, as being non-enabled, is maintained for reasons set forth therein and herebelow. New claims 40-44 are now included under this rejection.

Applicants state that they have deleted the phrase "functional fragment thereof". Applicants assert that methods and computational programs for conducting sequence comparisons for homology are well known within the art and that the calculation of percent homology is well within the abilities of a skilled artisan. Applicants contend that a candidate polypeptide can be aligned with SEQ ID NO: 2 as described at line 14 on page 10 through line 2 of page 11. Applicants argue that since the calculation of percent identity does not require any algorithms, a skilled artisan can easily determine if a candidate "morphogen" has at least 75% of the amino acids identical with SEQ ID NO: 2. Applicants further state that claim 1 has been

amended to include the functional limitation that the polynucleotide induces an immune response, and that non-functional polypeptides do not fall within the scope of the claims.

Applicants' arguments have been carefully considered, but are non-persuasive. It is noted that claim 4 still includes the limitation "functional fragment thereof". It is not clear what do Applicants mean by the term "morphogen". Although one skilled in the art may be able to a polynucleotide that encodes a polypeptide having an amino acid sequence that is "at least 75%", "at least 80%" and "at least 90%" homologous to SEQ ID NO: 2, as set forth in paragraph 22 of the Office Action mailed 02/25/02 (paper no. 15), there is no guarantee that such a polynucleotide that is at least 25%, at least 20% or at least 10% dissimilar with the polynucleotide of SEQ ID NO: 1 would retain the immunogenic functions and would induce an immune response in a mammal against a strain of *Chlamydia*. Absent a concrete showing, it is not predictable that such a polynucleotide that is at least 25%, at least 20% or at least 10% dissimilar with the polynucleotide of SEQ ID NO: 1 would even remain *Chlamydia*-specific. The instant specification lacks a structure-function correlation for the instantly claimed polynucleotides that are at least 25%, at least 20% or at least 10% dissimilar with the polynucleotide of SEQ ID NO: 1. The rejection stands.

Rejection(s) under 35 U.S.C. § 112, Second Paragraph

12) Claims 1-4, 10-14, 16, 18, 25, 26 and 38-44 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicants regard as the invention.

(a) Claim 1 is redundant in the recitation "polynucleotide comprising a polynucleotide" (see line 1).

(b) Claims 40 and 41 are vague and indefinite in the recitation "polypeptide having a sequence" (see line 2) without reciting that the sequence is an amino acid sequence. To obviate the rejection, it is suggested that Applicants replace the recitation -- polypeptide having an amino acid sequence--.

(c) Claims 2-4, 10-14, 16, 18, 25, 26 and 38-44, which depend directly or indirectly, from one of the above-identified base claim(s), are also rejected as being indefinite, because of the vagueness or indefiniteness identified above in the base claim(s).

Rejection(s) under 35 U.S.C. § 112, First Paragraph

13) Claims 40-44 are rejected under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. See paragraph 22 of the Office Action mailed 02/25/02 (paper no. 15) and paragraph 11 above for a detailed explanation.

Objection(s)

14) Claims 1, 40 and 41 are objected to for the following reasons:

(a) In line 9 of claim 1, for clarity, it is suggested that Applicants replace the recitation "by said mammal" with --in said mammal--.

(b) In line 5 of claim 1, for clarity, it is suggested that Applicants replace the recitation "to SEQ ID NO: 2" with --the amino acid sequence of SEQ ID NO: 2--.

(c) In line 4 of claim 1, for clarity, it is suggested that Applicants replace the recitation "polypeptide having a sequence" with --polypeptide having an amino acid sequence--.

(d) In line 2 of claims 40 and 41, for clarity, it is suggested that Applicants replace the recitation "homologous to SEQ ID NO: 2" with --homologous to the amino acid sequence of SEQ ID NO: 2--.

Remarks

15) Claims 1-4, 10-14, 16, 18, 19, 25 and 38-44 stand rejected.

16) The Applicants' amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. Applicants are reminded of the extension of time policy as set forth in 37 C.F.R 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 C.F.R 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Application SN 09/428,122
